

AI Use Declaration Form

Course: Introduction to Artificial Intelligence

Lab Title: Lab 4

Student Name: Kofi Asante Gyamebi

Student ID: 02522028

GitHub Repository Link: <https://github.com/kgyamebi/lab-2-predictive-analytics.git>

Date Submitted: 16/8/26

1. AI Use Summary

Question	Student Response
Did you use any AI tool for this lab?	Yes
Estimated percentage of the work influenced by AI	10 %
Did you attach evidence of AI use where applicable?	Yes

2. Details of AI Use

Complete the table below for each AI tool used. Add more rows where necessary.

Name of AI Tool Used	Purpose for Using the Tool	Prompt or Instruction Given to the Tool	Part(s) of the Work Influenced by the Tool	How I Verified, Edited, or Improved the AI Output
Copilot	Debugging	im getting JSONDecodeError, fix this	3.2	Code ran without error
Copilot	understanding concepts	What's the difference between a system prompt and a user prompt, explain simply	1.1	Verified my answers with slides, and understod the concept.
Copilot	explaining results	temperatures and unique outputs	1.2	Was able to understand and write reflection and answers

3. Attachment of AI Output Evidence

Where required, attach evidence of AI use. Tick all that apply. Add more rows where necessary.

Evidence Type	Attached? (Yes, No, N/A)	File Name
AI-generated draft		

Prompt history		
Screenshot of AI interaction	Yes	
Exported AI conversation		
AI-generated code snippet	yes	
Revised version showing student input		

What is hallucination in AI?

Hallucination in AI is when an AI model generates information that sounds believable but is **incorrect, made up, or not supported by the provided data.**

im getting JSONDecodeError, fix this

If you're getting a `JSONDecodeError` in **Part 3.2** or **Part 4.2**, the quickest fix is to make your `extract_fields()` function more robust.

fix this error, `ModuleNotFoundError: No module named 'dotenv'`

That error means the **python-dotenv** package is not installed in your virtual environment.

What's the difference between a system prompt and a user prompt, explain simply

Simple Difference

Think of it like this:

- **System Prompt** = the AI's job description
- **User Prompt** = the AI's task for today

4. Student Declaration

I declare that:

Declaration Statement	Response (Yes/No)
The submitted work is my own work.	Yes
Any use of AI tools has been clearly declared in this form.	Yes
The prompts, instructions, and AI-generated outputs have been disclosed where applicable.	Yes
I reviewed, tested, edited, and improved any AI-generated content before submission.	Yes
My AI usage does not exceed 25% of the entire work.	Yes
I understand that undeclared or excessive AI use may be treated as academic misconduct.	Yes
